

To Whom It May Concern

Re Australian Solar Power Consultants

Our relationship with Australian Solar Power Consultants goes back over several years.

Fred Dickman, a Director of the Company applied on our behalf for a 5kW system under the 44c per kW feed in Tariff regime several years ago. As a result we had a 5kW system installed in May 2013. Since then another kW of panels has been added.

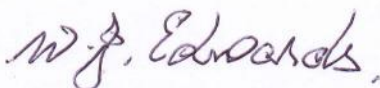

In all our dealings with Fred we have found him to be a reliable person who delivers on his promises.

Fred calls in regularly to check on the performance of the system. We have never had any issues with the performance and we are confident that Australian Solar Power Consultants use only quality components. The installation staff are competent, on the ball and good to deal with.

Australian Solar Power Consultants have also sponsored a tournament day and another one is planned.

We have no hesitation in recommending Australian Solar Power Consultants to anyone considering a solar system and we particularly recommend them to Bowls Clubs and their members.

Yours faithfully

Bill Edwards
Secretary
