

31<sup>st</sup> March 2015

After doing some homework on Solar, we found our choice was simple with Australian Solar Power Consultants. Fred explained the process in a simplified and easy to understand manner. His professional attitude and manner were obvious throughout the process.

We have installed a 30 kilowatt system to our business and a 5 kilowatt system to our residential property. It has proven to be a great financial decision and we couldn't be more pleased.

We would highly recommend Australian Solar Power Consultants to any one after an experienced and professional solar company.
