TESTIMONIAL

In June 2013, we installed an 18 kilowatt Solar System on one of our Company buildings in Kilcoy.

After being approached by several different Solar Installation Businesses, and feeling confused and overwhelmed by the mixed advice we were receiving, we were fortunate to make contact with Mr Fred Dickman of Australian Solar Power Consultants.

Immediately we were impressed with Fred's knowledge and honesty, and together we were able to agree on a Solar System that would give us optimum returns in both solar usage and financial benefit. We are at present pursuing further possibilities for solar generated energy for our businesses.

We cannot speak highly enough of Fred's professionalism, knowledge and experience in his field, and genuine interest in getting the best possible result for his client.

It is refreshing to do business with a company like Australian Solar Power Consultants where the customer is valued and their best interests are the highest goal.
